California Custom M-Ron Glass Wax

It is a cleaner and wax so you are not waxing over a dirty surface or getting a waxy build up. That's why M-Ron Glass gives you such an amazing shine! Because of how this works, we recommend to our customers that once applied; let it sit and bake in the sun for 15 to 30 minutes. You will get a deeper shine and a higher luster than you would if you were to apply it and take it off right away. It will never bake itself to the surface!

100% clear cote safe and can be applied in direct sun light. Even on a hot black surface you can literally dust off the residue. It absolutely will not stick! It can be used on all types of surfaces. It will not streak, haze or leave swirl marks even after repeated use. There are no abrasives, no silicone, no ammonia, and no fillers in this product. It is strictly a cleaner and wax. 12 oz. bottle.

WOODY WAX

Woody Wax Ultra Gloss Compound

- Contains oxidation removing components that break down oxidation as soon as it is applied.
- Contains a diminishing abrasive that gets finer as you polish, leaving a super high gloss finish. (High gloss finish in 1 step not 2 or 3!)
- Contains lubricants that reduce friction and heat, while aiding in the ease of application. These lubricants allow for use by hand or a high speed buffer without fear of damaging your finish.
- Contains waxes that penetrate into your gelcoat bringing out the original color and protecting your finish so you don't immediately have to apply a coat of wax on your new finish as you would with other compounds.
- As soon as ultra-gloss is applied, it starts to break down oxidation on the surface, so a ten minute lead time will actually make the surface better prepared for your buffing and compounding. Ultra-gloss will not dry on the surface.
- Ultra-gloss compound has a special abrasive that starts as a mid-grade compound and becomes finer as you buff ending up as a super fine polish. This process brings up the ultra gloss and showroom finish your boat once had.

WOODY WAX

Woody Wax Ultra Pine Wash & Wax Boat Soap

Non-alkaline, non-wax stripping boat soap is specifically designed for Woody Wax products. It will not strip your wax, and also leaves a wax finish behind which helps with water beading and a clean and easy rinse.

Safe for all parts of your boat. For pre-waxing cleaning try mixing 1 oz. Ultra Pine and 4 oz. bleach with 3-4 gallons of water.

Specialty formulated not to remove waxes and leaves a wax finish. Anti-bacterial additive kills mold spores and odors on contact. Removes salt deposits easily and rinses without streaking or spotting. Safe for all surfaces; non-alkaline.

CORROSIONX

Corrosion Technologies Rejex

Space Age Protection For Smooth Surfaces

Rejex is a thin-film polymer coating designed to provide a high-release surface. This very thin film - less than a micron thick - reduces the adhesion of common contaminants such as exhaust, bugs, oil, tree sap, bird droppings, road grime, brake dust, etc. that can leave stains. Can be applied to windshields to repel rain. It's easy to apply and produces a deep, lustrous shine that lasts for months.

Should be applied to a cool (between 50° and 80° F) dry surface that's out of direct sunlight. Wipe on, allow to dry to a haze, wipe off, then allowed to cure for 12 hours. It is very important to allow Rejex to cure 12 hours after the haze has been wiped off. Protects and beautifies painted metal, glass, acrylic, gel coat, fiberglass, glossy plastic and polished metal surfaces. Not meant to be used on porous surfaces, highly oxidized painted surfaces, or to fill fine scratches.
